Project Name	Nutrition Assistant Application

The screenshot displays the Twilio SendGrid dashboard interface. On the left is a sidebar menu with options: Dashboard, Email API, Marketing, Design Library, Stats, Activity, Suppressions, Settings, and Twilio SMS. The main content area is titled 'Send your first emails with Twilio SendGrid' and includes an illustration of two people running. Below this, the 'Create a sender identity' section explains that a sender identity is the 'from' email address. It offers two options: 'Create a Single Sender' (highlighted in a blue button) and 'Authenticate a domain instead'. An example email header is shown: 'Your Business <jane.doe@your_business.com> to me'. At the bottom, a 'Send your first email' section contains a message: 'Please create a sender identity before sending your first email.' The left sidebar also shows a 'REPUTATION' bar at 100%.

REPUTATION 100%

To get up and running quickly, please follow the steps outlined below.

Send your first emails with Twilio SendGrid

Create a sender identity

Before sending email, you'll need to create a sender identity. There are [two ways](#) to do this, but we recommend creating a Single Sender to get set up quickly and test your email integration.

[Create a Single Sender](#) [Authenticate a domain instead](#)

Your sender identity is the "from" email address your recipients will see in their inbox. [Learn more about this.](#)

Your Business <jane.doe@your_business.com>
to me

Send your first email

Please create a sender identity before sending your first email.
